9/6/2005 3:00:57 PM	17,527	4918
		6,818

Current Page No: 13 Total Page No: 31 Zoom Factor: 100%

With KYOcount it is no longer necessary to manually record and document the printers and multifunctional devices (MFPs) in use and their counter readings. This software provides precise information on how many pages are printed in a defined period of time for each device in a network and automatically presents the data in graphical bar or pie chart format, allowing easy integration into customer reports.

KYOCERA KYOcount Report 21.12.2005

Group: Color Devices Report Period: between 6/5/2005 and 12/31/2005

Output Volumes

	Prints	Copies	Fax	Sum
Black&White	30,616	7,126	699	38,441

Unspecified Output Volume: 0

Current Page No: 1 Total Page No: 1 Zoom Factor: 100%

The new KYOcount 3.01 from Kyocera is based on the proven KYOcount 3.0 system and incorporates a wide variety of additional functions. KYOcount 3.01 enables the administration and management of printers and MFPs across the company network so you can monitor and operate an entire system more efficiently and professionally. As all Kyocera products and solutions are, KYOcount software is highly flexible and easy to operate. Designed to work with all Kyocera systems, KYOcount 3.01 can also be used in conjunction with other manufacturers' devices based on the industry standard SNMP (Simple Network Management Protocol).

Simply download the free easy-to-install 90-day trial version offering you unlimited functionality from www.kyocount.com.

To continue to take advantage of all the product features after the trial period just purchase a license code available at your local Kyocera Business Partner.

THE WAY IT WORKS.

With the KYOcount 3.01 administrators/controllers now have a complete and centralised overview of:

- All counter related data
- Asset management
- Device availability
- System utilisation
- The exact number of pages produced per device or network
- Pre-warnings and
- Job-routing based on privileges.

Simply export data as e.g. CSV, XML into your chosen software application or into an existing ERP or accounting system.

To connect to an external application, please contact your local Kyocera Business Partner.

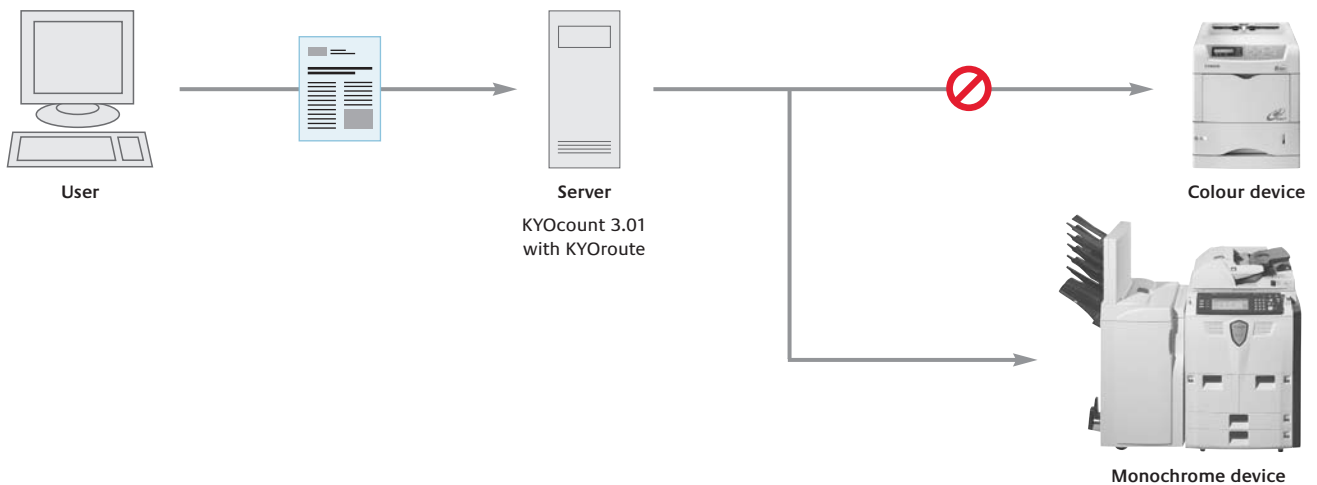

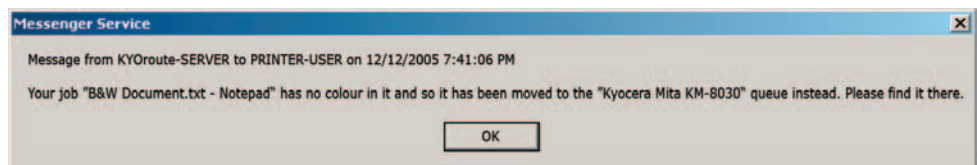

KYOROUTE CHOOSES THE PATH OF LEAST RESISTANCE.

To further boost your system's efficiency, the KYOroute plug-in is available for KYOcount 3.01. This easy-to-use program brings a new level of efficiency to your printing. By automatically routing documents, it increases productivity, minimises downtime and can also save you costs.

KYOroute in action:

Scenario 1:

A large black & white document is sent to a colour printer for multiple printings. KYOroute automatically sends a message to the user, then re-routes the document to a monochrome device.

Scenario 2:

A document is sent to a printer that is out of operation. KYOroute re-routes the job to a running device. Instantly, the user receives a message straight to the PC announcing that the document has been re-routed plus the information where to pick it up.

SAVING YOU MORE THAN JUST PAPER.

Key features that allow KYOcount to optimise the workflow:

- Automated reading of counters on network devices.
- Automated sending of the recorded data.
- Data export in CSV format.
- Creation of graphical device overviews and volume reports.

A variety of useful new features have been added in the KYOcount 3.01 version:

- Fast device identification.
- Statistical toner consumption calculation.
- Calculation of remaining pages and lifetime of toner kits.
- Real-time status of information on network device activity.
- Status and pre-warnings.

YOUR BENEFITS

KYOcount 3.01 allows system administrators to:

- Save time and money by not having to manually check counter levels.
- Save time by not requiring data to be reformatted for other applications.
- Rely on accurate counter figures for optimal cost control.
- Target and troubleshoot specific devices more quickly.
- Significantly decrease system downtime.
- Plan the allocation of resources and materials such as paper and toner more accurately and effectively.

**A UNIQUE APPROACH.
FROM A UNIQUE PROVIDER.**

IMPROVED SYSTEM INTEGRATION

Easy to use network integration and management substantially reduces maintenance costs.

ADVANCED USABILITY

One unique proven user interface is available for all windows based operating systems.

FUNCTIONS TAILOR-MADE TO CUSTOMER REQUIREMENTS

Innovative functions provide solutions for ambitious customers ranging from small businesses to large enterprises.

SECURE CUSTOMER INVESTMENT

Integration into customer IT environments, supporting various professional requirements, is as easy as never before.

REDUCED TOTAL COST OF OWNERSHIP

Kyocera's already low TCO (Total Cost of Ownership) is reduced even further.
